

## Signs and Symptoms in IDdx

> = General; E = ENT; G = GI; H = Hematology; N = Neurology; O = Eye; R = Lung; S = Skin; U = Urinary; X = X-ray; \* = Complications

>arthralgia
>fatigue, weakness
>fever
>fever, biphasic or relapsing
>myalgia
>relative bradycardia
E dysphagia
E epistaxis
E nasal ulcers
E pharyngitis
E rhinitis
E stomatitis
G abdominal mass
G abdominal pain
G blood in stool
G constipation
G diarrhea
G fecal leukocytes
G hematemesis
G hepatomegaly
G jaundice
G liver function test, abnormal
G nausea, vomiting
H anemia
H eosinophilia
H hemolysis
H hypergammaglobulinemia
H leukocytosis
H leukopenia
H lymphadenopathy
H splenomegaly
H thrombocytopenia
N confusion, delirium
N headache
N lethargy
N muscle weakness

N opisthotonus
N paresthesia
N seizure
N stiff neck
O conjunctivitis, acute
O oculoglandular syndrome
R chest pain
R cough
R dyspnea
R hemoptysis
R sputum production
R wheezing
S cellulitis or rash, circinate
S entry wound with lymph nodes
S lymphadenitis, acute
S lymphangitis
S nodular lymphangitis
S papules or plaques
S petechiae and ecchymoses
S pustule
S rash (exanthem)
S rash on palms
S skin blister or vesicles
S skin or subcutaneous nodule
S ulcer of skin
S urticaria
S warty growth of the skin
S skin lesion, linear or serpiginous
U hematuria
U pyuria
X cystic or cavitory lesions
X hilar lymphadenopathy
X lung infiltrates
X pleural effusions
*acute renal failure
*ARDS

*arthritis
*bleeding tendency
*blindness
*bowel obstruction
*brain abscess or lesion
*cancer
*cirrhosis
*cranial neuropathy
*encephalitis
*endocarditis
*epididymo-orchitis
*erythema nodosum
*glomerulonephritis
*hepatitis
*mediastinitis
*meningitis
*myelitis
*myocarditis
*osteomyelitis
*pancreatitis
*paralysis
*parotitis
*pericarditis
*peripheral neuropathy
*pneumonia
*pneumonitis
*pulmonary edema
*rhabdomyolysis
*sepsis
*shock
*stupor, coma
*uveitis
*weight loss
